

Camp Bike

Intro & Required reading

Black Rock City is vast. While you can explore it on foot—and I strongly recommend dedicating at least one full day to walking, as it offers a unique and immersive experience—the convenience and speed of a bike provide unmatched freedom of movement.

Definitely read this page:

Bringing vs. Renting

You have the option to bring your own bike, but many campers choose to rent one from the camp instead. The camp offers a selection of bikes in different conditions for rental. Renting a bike is a convenient option if you prefer to travel light and helps prevent bikes from being abandoned on the playa by those who can't take them back home.

The bike team

The camp's bike lead and a bike team handle our bike, including fixing the bike during the event (and by the way they are awesome!).
